SS19

Confidential - For PING accounts in the USA Only. Not To Be Distributed To Other Golf Manufacturers.

Golf. We never stop thinking about it. From the moment Karsten Solheim invented the PING 1-A putter back in 1959 we've been a leading innovator in golf. Engineered exclusively for golfers, PING apparel combines the latest technology, state-of-the-art fabrics and production methods, alongside luxury materials and craftsmanship, to provide unrivaled quality and performance. Inspired by golf and our heritage, driven by a thirst for innovation, the new apparel collection is aesthetically pure, performance driven and tailored for the modern game.

SENSOR TECHNOLOGY PLATFORM

sensorcool

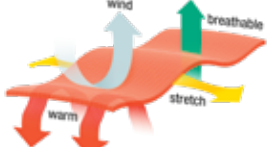

KEEPING YOU **COOL** AND **COMFORTABLE** IN WARM CONDITIONS

Golf clothing engineered to perform on the golf course, from the base layer through to the outer layer. The Sensor Technology Platform is a system that ensures the clothing you wear on the course works with your body, as well as the demands of the game. The platform consists of Sensor Cool, Sensor Warm and Sensor Dry technologies.

- ▶ MOISTURE MOVEMENT
- ▶ QUICK DRYING
- ▶ UV PROTECTION
- ▶ CREASE RESISTANT
- ▶ STRETCH

ENGINEERED WITH
COOLMAX

TEKFIT TECHNOLOGY

A cutting-edge innovation, Tekfit® waistband technology provides up to two inches of additional waistband stretch for a more comfortable, flexible fit that enables a greater range of movement and freedom of motion.

TEKFIT
by Talon®

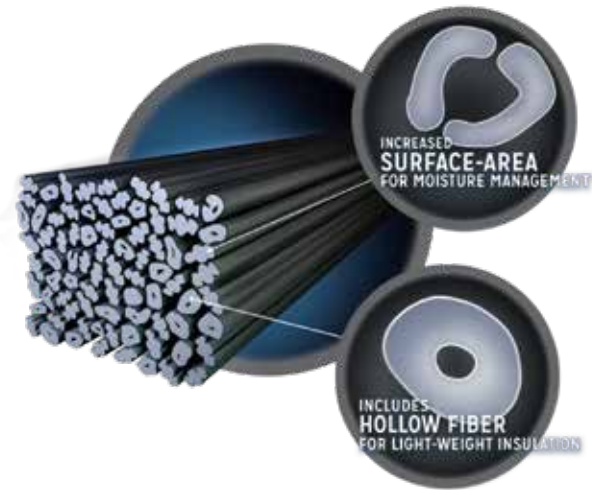

COOLMAX TECHNOLOGY

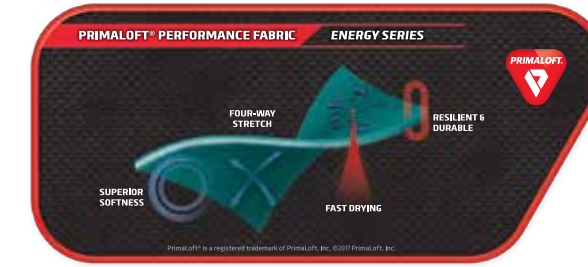

COOLMAX® ALL SEASON fabric optimizes the body's natural thermoregulation capabilities. The fabric contains fibers with a channeled surface to move moisture away from the body when the golfer is hot. In addition, fibers with a hollow core provide insulation for added comfort on colder days.

COOLMAX® technology offers permanent and effective cooling power because of its fiber-based moisture management properties that cannot be washed off.

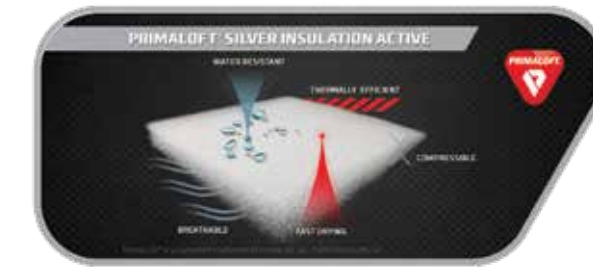

COOLMAX

PRIMALOFT TECHNOLOGY

PRIMALOFT ENERGY SERIES combines proprietary PrimaLoft technology with fiber blends to provide the highest level of comfort, stretch and recovery. Fabrics are soft, flexible and highly breathable to move with the golfer.

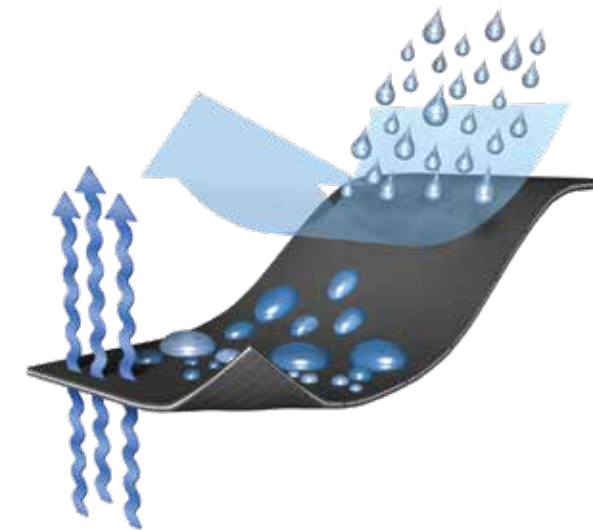

PRIMALOFT SILVER ACTIVE provides breathable insulation and warmth without bulk using water-repellent fibers that live independent of restrictive fabrics, offering freedom of movement in a lightweight design.

PERTEX TECHNOLOGY

PERTEX SHIELD offers superior levels of wind and water protection with excellent breathability to create the ultimate lightweight, waterproof performance fabric for fast-moving outdoor athletes and activities.

The Zero Gravity Tour range of waterproof and windproof products offers comprehensive layering options for lightweight all-weather protection.

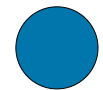

PERTEX
SHIELD

Sedona Sunrise. SS19 takes its inspiration from the colors and natural landscape of the beautiful town of Sedona and the state of Arizona. As the longtime home of PING, Arizona has a deep connection to our brand and heritage. In exploring this special place, we find a rich source of inspiration. The natural gradients of red and orange within the landscape, the stunning gold sunsets and brilliant blue skies all inspire our colors and patterns this season. They form an all-inclusive palette of colors that work beautifully together or when used within individual color stories.

HOW TO MEASURE YOUR BODY FOR SIZE

CHEST: Measure around the fullest part of your chest, keeping the tape horizontal.

WAIST: Measure around the narrowest part of your waist keeping the tape horizontal.

(If you bend to the side, the crease that forms is your natural waistline.)
